WHAT IS CLAIMED IS:

1. A disposable body fluids absorbent article adapted to be placed against a crotch region of a wearer to absorb body fluids, comprising a liquid-absorbent core configured substantially in a narrow rectangle longitudinally oriented along said crotch region and having an upper surface covered with a liquid-pervious topsheet and a lower surface, and

said liquid-absorbent core being provided in the vicinity of opposite side edges extending in a longitudinal direction thereof with depressed. regions tapering from said upper surface toward said lower surface and lying along a pair of imaginary lines extending in said longitudinal direction so as to describe convex curves respectively facing a center line bisecting a width of said liquid-absorbent core.

- 2. The article according to Claim 1, wherein said depressed regions continuously extend along said imaginary lines.
- 3. The article according to Claim 1, wherein said depressed regions intermittently extend along said imaginary lines.
- 4. The article according to Claim 1, wherein said liquid-absorbent core contains a fibrous component and a density of said fibrous component in said depressed regions is equal to or lower than a density of said fibrous component in the remaining region.
- 5. The article according to Claims 1, wherein said liquid absorbent core further contains superabsorptive polymer particles distributed only in a region defined inside said imaginary lines about said center line.
